

STANDARD FORM NO. 64

~~SECRET~~*Office Memorandum* • UNITED STATES GOVERNMENT

TO : Chief, Research and Development Branch, OC-E DATE: 5 June 1956

FROM :

50X1

SUBJECT: Modification of RS-13 Transmitters

1. Existing operational requirements have indicated that it is desired to modify certain of the present frequency-shift RS-13 transmitters to conform to the manner in which the experimental unit was modified by the [redacted]. Consequently, [redacted] was requested to submit a proposal to accomplish this work on certain of these units.

50X1

50X1

2. The [redacted] proposal indicates that the unit cost is \$783.00. This cost is considered excessive; therefore, the writer undertook to determine the minimum number of sets required to meet operational needs.

50X1

3. Based on a dispatch to the field, [redacted] dated 10 May 1956, and upon discussions with Support Branch, OC-O&T, the latest information indicates that only one unit is required. However, further discussions with Support Branch on 4 June indicate that it would be desirable to have two such units modified. Consequently, this has been discussed with [redacted] at the Laboratory, who has agreed that the performance of this work will not seriously interfere with any other Laboratory obligations.

50X1

50X1

4. It is therefore suggested that a Laboratory Work Order be issued to cover the effort necessary and to establish a deadline of 15 July for the first unit. This unit may then be air-shipped to the EUCA area to fulfill a requirement whose deadline is 1 August.
